

Feed Phase

Feed Phase can be found on the Feed or Feed Management Setup tab. It is a way to roll up similar diets for more concise reports. For example, some mills will change the name or code of a diet if a medicine is added. Technically, this diet would still fall under Ration 2, but now it would have to be added to your diet list as a new diet, as well as your feed budget. With phasing, the diets can both be set to a Finish 2 Phase, so that when you run a report, it will only tell you the phase and not all the separate diets that may be involved in the phase of this feed budget.

Once Feed Phases are set up, you will assign them at the mill Diet level. See procedure for Diets.

To Add a Phase, click the Add button. Fill in information, click Save.
