

## Feed Reconciliation

Feed Reconciliation can be found on the Feed Management tab under Ordering and opens in a new browser tab when launched. The Feed Reconciliation screen is where you can apply Feed Deliveries to Feed Orders when they were not matched up during the Feed Import process. This will also assign the feed delivery to the feed bin it was ordered to. You can also edit incorrectly applied feed on this tab.

Feed Orders tab – These are orders that have not yet been applied to a delivery (import).

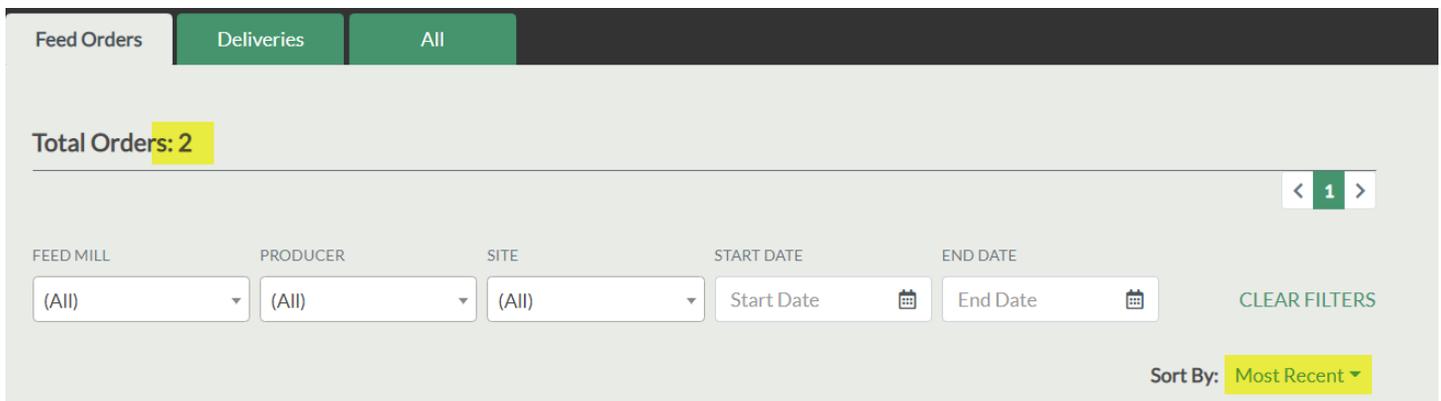

Deliveries tab – These are deliveries (imports) that have not yet been applied to an order. The screen defaults to only deliveries within the last 30 days. You can use the date filters to go back farther if needed.

These two tabs should balance out.

All tab – This shows all deliveries, both reconciled and unreconciled. This tab is where you would change the order a delivery was applied to.

### Feed Orders

At the top you will see the Total Orders that have not been reconciled. You can use the filters and Sort By dropdown to narrow your search if needed.
