

Fixing Link Errors

Link Errors are new Producer and Plant numbers being introduced into the system. You will see these errors any time you import for a new Packer or for a new Producer.

To Fix the Link Error

Errors have been found for these imports. Please correct these and use **SEARCH** to validate the changes.

Error Message

- Row 1, 21023 Link Key or one of its segments was not found. Please correct the Link table and try again

- Row 2, 21023 Link Key or one of its segments was not found. Please correct the Link table and try again

- Row 3, 21023 Link Key or one of its segments was not found. Please correct the Link table and try again

- Row 4, 21023 Link Key or one of its segments was not found. Please correct the Link table and try again

Look for the number that needs to be linked in the Error Message section. Find the Reference column and place your cursor behind the number needing linked. Click on the Reference header (it will be underlined)

The Link popup will open.

Table Maintenance (QA) Laura Mierka [Log Out]

Verify you have the correct Link Key 1 and then click Save and Close

Save (Ctrl-S) Save and Close Print All Add Rows: Add (Ctrl-A) Select Close

Table: Import Link Values

Row #	*Link Type	*Link Key 1	Link Key 2	Link Key 3	Packer	Active
1	Link	21023			JBS (Cargill-E)	<input checked="" type="checkbox"/>

Click Search to refresh your screen. If loads are Ok to Import, import as usual.

If you are shipping to a new plant, that link will also need to be created. **Note if the Plant is a Swift plant this step will not work. Please contact Customer Support.
