

January 2026 Release

Release Notes

A MetaFarms software release will be implemented on January 15, 2026. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

** Note: Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

Release Features

Finish

Feature 8298: Add 'Avg Weight' to Pig Movements Tab of Group Detail Report

'Avg Weight' has been added as column P to the Pig Movements tab of the Group Detail report.

Sow

Feature 8297: Shift Axis for 'Average Total & Live Born' Graph on Sow Performance Monitor

The y-axis of the 'Average Total & Live Born' graph on the 'Graphs - Farrowing & Weaning' tab of the Sow Performance Monitor has been updated to properly show the range of total and born alive numbers.

If you have any questions about the release, please contact MetaFarms Support at support@metafarms.com

Sincerely,

Your MetaFarms Customer Support/Account Services Team
