

## ***July 2025 Release***

### **Release Notes**

---

A MetaFarms software release will be implemented on July 29, 2025. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

**\*\* Note:** Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

### **Release Features**

#### **Finish**

##### **Feature 7591: "Require Pig Flow" added as new Setting in Company Defaults**

Added a new flag to the 'Group Defaults' section of Company Defaults named "Require Pig Flow". When this is checked, a Pig Flow must be selected when creating a group.

##### **Feature 7673: Cost Per Volume Information added to Combined Group Closeout Report**

Average cost per bushel, Average cost per ton (DDGS) and Average cost per ton (SBM) were added as rows 106, 109 and 112 to the Combined Group Closeout report.

##### **Feature 7678: 1<sup>st</sup> Wean Date added to Inventory Flow (Weeks on Feed) Report**

1<sup>st</sup> Wean Date Placed was added as Column Y to the Inventory Flow (Weeks on Feed) report.

#### **Sow**

##### **Feature 7568: Compliance Flag in Sheet Entry of Services**

Added the ability to mark a Service as Prop 12 compliant with Sheet Entry. When a Service is submitted with the compliance flag, all associated Matings within the Service will also be marked as compliant.

**Feature 7688: Block Event Entry after Removal when Requiring Events in Valid Status**

When the Site Default 'Require Events in Valid Status' is enabled, events will not be able to be applied to a removed sow even when attempting to backdate an event before the Removal.

**Sales****Feature 7564: Additional Premium Value added to Summary Kill Sheet Report**

Total Additional Premium was added as Row 42 to the 'Summary Kill Sheet' tab of the report.

**Release Defects****Finish****Defect 7551: Highlighting Cells on Mortality By Production Week Report**

The report now correctly highlights cell values in Column AJ over the mortality curve percentage applied to the group on the '% Dead' and '# Dead' tabs.

**Sow****Defect 7563: Nedap Resend Process**

Sow ESF Interface form was updated to not allow sending of Removed Sows to ESF. The checkbox to Resend is now hidden for rows of removed sows.

**Defect 7613: Sheet Entry of Multiple Farrow Events**

Fixed an issue that allowed multiple Farrows to be posted to an individual sow through Sheet Entry when done in a certain sequence.

**Defect 7681: Feed Based Growth Curve Precision**

Fixed the Feed Based Growth Curve calculation when 3 digits of precision are used and falls between 2 digits ranges.

**Defect 7556: Sow History Data**

Fixed an issue that was displaying the wrong Source Data in Sow History for an arrived sow when entered via Sow Mobile.

Sincerely,

Your MetaFarms Customer Support/Account Services Team
