

June 2024 Release

Release Notes

The MetaFarms software release will be implemented on June 18, 2024. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

**** Note:** Additions to reports can result in changing column headers and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

New columns added to reports will be visible in the MetaFarms Full version and hidden in the MetaFarms Summary version.

Release Features

Finish

Feature 5892 – Add Country of Origin Calculation to Company Defaults

We have added the ability to set Country of Origin Labeling (COOL) at the Company Level. This allows a Default Country to be selected or calculated based upon the site or pig supplier. Label will be calculated based upon movements into a group. When turned on, Country of Origin label will be inactive on Group Create/Edit form. If you have questions or would like help setting this up, please contact MetaFarms Support.

**** Feature 5856 – Add Genetics to Active Group Summary Report**

Genetics was added as column AA to the Active Group Summary report All Types tab. If you have macros built against this report, you will need to modify them to work with these additions.

Sales

**** Feature 5953 – Add Truck Type and Truck Number to Daily Market Loads by Date Delivered Report**

Truck Type was added as column AK and Truck Number was added as column AL on the Daily Market Loads by Date Delivered report Detail tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5954 – Add Truck Company and Truck Type to Driver Ratings Report**

Truck Company was added as column H and Truck Type was added as column I to the Driver Ratings report Lot Detail tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5956 – Add Truck Type and Truck Number to Market Sales Distribution Charts Report**

Truck Type was added as column V and Truck Number was added as column W the Market Sales Distribution Chart report All tabs. If you have macros built against this report, you will need to modify them to work with these additions. This report was also changed from an Excel 97-2003 Workbook (.XLS) format to the current .XLSX format to support more file data.

**** Feature 5957 – Add Truck Type and Truck Number to Market Sales Summary Report**

Truck Type was added as column AI and Truck Number was added as column AJ to the Sales tab of the Market Sales Summary report Sales tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5958 – Add Truck Type to Market Transportation Analysis Report**

Truck Type was added as column AB to the Market Transportation Analysis report Lot Detail tab. If you have macros built against this report, you will need to modify them to work with these additions.

Sow

Feature 6000 – Order and Distinct Flags on Sow Cards

Sow Cards will not show duplicate flags and flags will now be in chronological order based on their event date.

Feature 5930 – Semen Batch on Sow History Export

Sow History Export has been updated to include the Semen Batch Name when the Boar ID is left blank.

**** Feature 5836 – Add Current Status to Sow Treatment Report**

Current Status was added as column P to the Treatments report. If you have macros built against this report, you may need to modify them to work with these additions.

**** Feature 5925 – Add Supplier Tag to Move In List Report**

Supplier Tag was added as column D to the Move In List report Move In List tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5959 – Add Supplier Tag to Move In List (Breed Batch) Report**

Supplier Tag was added as column D to the Move In List (Breed Batch) report Move In List tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5926 – Add Supplier Tag to Services by Breed Week Report**

Supplier Tag was added as column B to the Services by Breed Week report All tabs. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5942 – Add Supplier Tag to Services by Breed Week (Breed Batch) Report**

Supplier Tag was added as column B to the Services By Breed Week (Breed Batch) report All tabs. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5927 – Add Supplier Tag to Farrowing Chart Report**

Supplier Tag was added as column B to the Farrowing Chart report Services tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5943 – Add Supplier Tag to Farrowing Chart (Breed Batch) Report**

Supplier Tag was added as column B to the Farrowing Chart (Breed Batch) report Services tab. If you have macros built against this report, you will need to modify them to work with these additions.

**** Feature 5928 – Add Supplier Tag to Data Entry Review Report**

Supplier Tag was added to the following tabs in the Data Entry Review report:

Gilt-Sow Arrivals – Column I

Farrowings – Column B

Piglet Deaths – Column B

Fosters – Column B

Nurse On – Column B

Weans – Column C

Services – Column B

Matings – Column B

Preg Checks – Column B

Gilt-Sow Removals – Column B

Retag Sows – Column D

Treatments – Column B

Locations – Column B

Comment – Column B

Flag – Column B

To Be Culled – Column B

If you have macros built against this report, you will need to modify them to work with these additions.

Release Defects

Sow

Defect 5750 – Sow Inventory Report Cutoff Date

Fixed an issue where the Sow Inventory cutoff date did not include the inventory for the end date of the report. It is now included.

Defect 5751 – Review Mobile Events

Fixed an issue where the date on a Mobile Event could be entered too far into the future. New logic will now stop it from saving.

Defect 5847 – Semen Batch Entry

Fixed an issue so a user with limited access to a single site can access the Semen Batch Entry grid.

Defect 5836 – Include Removed Sows in Sow Treatment Report

Fixed an issue where the removed sows were not included in the report.

Defect 5996 – Piglet Inventory Calculation

Fixed an issue where the piglet inventory wasn't calculating correctly when a nurse on event is completed on the same day as the wean event.

Defect 5839 – Updating Birthdate and Age on Sow Events

Fixed an issue with Birthdate and Age on Sow Events to allow the records to be properly saved when updated in Sow Data Entry.

Finance

Defect 5786 – Adding Address to Unassigned Pig Supplier Location

Fixed an issue to allow saving a street address to a pig supplier location that had not been assigned to a pig supplier.

Sincerely,

Your MetaFarms Customer Support/Account Services Team
