

June 2025 Release

Release Notes

A MetaFarms software release will be implemented on June 10, 2025. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

**** Note:** Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

Release Features

Producer/Site/Barns

Feature 7401: Attributes Added to Barn Edit Form

Introduced two new sections to the Barn Edit form: **Biosecurity** and **Additional Attributes**. Information entered in these sections will now appear in the Barn Report once selections are made.

Reporting

Feature 7394: Columns Added to Barn Report

Added columns to the 'Barns' tab of the Barn Report to display the new attributes from the Barn Edit form. These attributes are located in columns CO through DG.

Release Defects

Finish

Defect 7346: Date Formatting on Group List Report

Fixed an issue that was incorrectly formatting the date in column Z.

Defect 454: Highlighting of Mortality % To Date on Mortality By Production Week Report

The report now correctly highlights cell values in column AJ over the mortality curve percentage applied to the group.

Sincerely,

Your MetaFarms Customer Support/Account Services Team
