

## March 2026 Release

### Release Notes

---

A MetaFarms software release will be implemented on March 17, 2026. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

\*\* Note: Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

### Release Features

#### Sow

##### **New Product Feature: Prop 12 Sow Event**

MetaFarms has added the ability to track Prop 12 compliance with a new Sow Event. There are options to do both 'Rolling Prop 12' such that the sow remains in Prop 12 status indefinitely and 'Reset Prop 12 After Wean' such that a sow's Prop 12 status will reset for each parity. If you are interested or have questions about this new feature, please reach out to MetaFarms Support to schedule time to discuss further.

##### **Feature 8429: Add Due Date Calculation to Sow Card Templates**

Added support for 'Calculate Due Date with Average Gestation Days' to the following Sow Card templates:

- 1 card per page, Due Date Header
- 1 card per page with medication
- 1 card per page with mating and feed
- 1 card per page with next mating

## Release Defects

### **Assurance**

#### **Bug 8687: Fix Supervisor Filter for Scheduled Reports**

Fixed an issue that prevented users from filtering on Supervisor for Scheduled Reports in Assurance.

Sincerely,

Your MetaFarms Customer Support/Account Services Team
