Mortality App Summary Page by Category

A new section has been added to the Mortality app to summarize deaths by Site and Category. The Mortality by Production Week and the Mortality List reports will show the Category column.

To use this section your Mortality Reasons must have a Category assigned to them.

Category setup can be found under Finish, Setup, Mortality Categories.

Once your Categories are set up, go to Mortality Reasons and assign each Reason a Category. Once you have Categories assigned, your past deaths will backfill with the categories.

When in the Mortality app, tap the Menu in the upper left and choose Summary to view.
