

## **November 2025 Release**

### **Release Notes**

---

A MetaFarms software release will be implemented on November 18, 2025. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

\*\* Note: Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

### **Release Features**

#### **Analytics**

##### **Feature 8052: Add '% Mortality' to Weekly System Report**

'% Mortality' has been added to the Weekly System Report for Closed Groups in the Nursery, Finish, Wean-to-Finish, and GDU sections. '% Mortality' is calculated as "Deaths Entered in Group / Pigs In".

##### **Feature 8046: Add Ending Mated Inventory Subtotals to System Sow Farm Comparison Report**

Ending mated inventory subtotals have been added in rows 110-117 of the System Sow Farm Comparison report. Total Pregnant, Total Lactating, Total Weaned, and Total Open are now shown along with their percentage of ending mated inventory.

#### **Feed**

##### **Feature 8007: Add 'Sort By' Control to Feed Deliveries Report**

A new 'Sort By' control has been added to the Feed Deliveries report menu, allowing users to sort results by *Delivery Date* or *Group*. Selecting *Group* sorts the report alphabetically by Producer, then Site, then Group.

### **Feature 8060: Update Feed Deliveries Report to .XLSX Format**

The Feed Deliveries report is now available in .XLSX format, allowing for more rows and improved data capacity.

### **Sales**

#### **Feature 6890: Pork King Packer Import**

A new packer import has been created for data received from Pork King Packing, Inc. (Marengo, IL). Since Pork King does not currently provide importable data files, a set of template files has been created to support this import. Customers will be required to manually enter data from the kill sheet and carcass detail spreadsheet into these templates.

If you are interested in using this new import, please contact MetaFarms Support.

#### **Feature 7957: Add DOAs to Movement Sales Summary Report**

The Movement Sales Summary has been updated to include DOAs linked to Market Sales. DOAs not associated with a Market Sale are excluded from the report.

### **Sow**

#### **Feature 8048: Add 'Last Breed Week' to Sow Physical Count Report**

'Last Breed Week' has been added as column Q to the Gestating and Lactating tabs and column P to the Open tab of the Sow Physical Count report.

#### **Feature 8049: Add 'Last Breed Week' to Sow Status List Report**

'Last Breed Week' has been added as column Q to the Gestating, Lactating, and Removed tabs and column P to the Open tab of the Sow Physical Count report.

#### **Feature 8050: Add 'Sow Index' to Services By Breed Week Report**

'Sow Index' has been added as column G to the Services By Breed Week report.

Sow Index is calculated based on the entire sow herd, not just the sows included in the report. Sow Index reflects their ranking as of the current date, regardless of report selection.

#### **Feature 8008: Add 'Sow Index' to Move In List and Move In List (Breed Batch) Reports**

'Sow Index' has been added as column K to the Move In List and Move In List (Breed Batch) reports.

Sow Index is calculated based on the entire sow herd, not just the sows included in the report. Sow Index reflects their ranking as of the current date, regardless of report selection.

## Release Defects

### Finish

#### **Defect 8109: Beginning Pigs Total on Group Inventory Distribution (Monthly) Report**

Fixed an issue with Beginning Pigs total in cell V11 of the Group Inventory Distribution (Monthly) report.

#### **Defect 8167: HNS Calculation for Total Open Inventory (of Ending Mated Inventory)**

Fixed an issue with the calculation of Total Open inventory when an HNS followed the first service.
