Original sow (normal wean, all fallbacks, or a few fallbacks)
Original sow (foster situation)
Original sow (nurse sow situation)
All pigs remain on the sow for the entire lactation period and are weaned at the end of the period
All pigs are falling behind or the sow must be removed early from the farrowing house. Pigs may be fostered off/on in a foster situation or a nurse sow may be used.
Some pigs falling behind and others are normal and may not need to be moved
Pigs doing well but extra teat space is available due to foster off event or small original litter
All pigs remain on the sow for the entire lactation period and are weaned at the end of the period
Wean pigs as normal (all pigs LEAVE the farrowing house)
Foster off all pigs and either foster them in a normal foster off/on situation (continue to the foster on step) or foster off all pigs and nurse on to a nurse sow (in either case, pigs STAY in the farrowing house)
To foster on step
Foster off individual pigs to a foster situation or to a nurse sow (pigs STAY in the farrowing house)
Foster on pigs
Wean pigs as normal (all pigs LEAVE the farrowing house)
Sow and pigs are included in calculations for pigs weaned / sow and pigs weaned / sows weaned > 0 piglets
Wean zero for the original sow
Wean any remaining pigs from the original litter as normal (if or when of wean age; all weaned pigs LEAVE the farrowing house)
Wean pigs as normal (all pigs LEAVE the farrowing house)
Sow and pigs are included in calculations for pigs weaned / sow and pigs weaned / sows weaned > 0 piglets
The sow is included in the denominator for calculations for pigs weaned / sow but NOT for pigs weaned / sows weaned > 0 piglets. Pigs are not included in weaning numbers for this sow as they were fostered off. The pigs are accounted for when the nurse sow or foster sow weans.
The sow and any pigs weaned are included in calculations for pigs weaned / sow and pigs weaned / sows weaned > 0 piglets. Fostered off pigs are included in the wean numbers for the nurse sow or foster on sow.
The sow and pigs are included in the calculations for pigs weaned / sow and pigs weaned / sows weaned > 0 piglets
The sow is retained as a nurse sow
Nurse on piglets (lactation status turned on again for the sow)
Wean pigs as normal for the second weaning (all pigs LEAVE the farrowing house)
The sow and pigs are included in the calculations for pigs weaned / sow and pigs weaned / sows weaned > 0 piglets
If the second weaning occurs within the same week as the first weaning, the sow will be counted twice in the denominator for both calculations.
