# Pig Flows

Your data entry grid will come up and display any current Pig Flows you have. Click the Add button to add a new Pig Flow. Note fields with a (*) are required. Others are optional. The code is what you will use during data entry and must be unique.

Name your Pig Flow and give it a Code. Fill in any information that you choose. To have the Mortality Curve and Estimated Mortality default on any new groups set up with this Pig Flow, fill in the highlighted areas with the defaults you want to carry over.   (CF) is a Continuous Flow Group.

| Row | Edit | *Name | *Code | Short Name | Active | Details | Health Status | Weaned Pigs |
|-----|------|-------|-------|------------|--------|---------|---------------|-------------|
| | | | | | ☐ | | | |
