September 2025 Release

Release Notes

A MetaFarms software release will be implemented on September 30, 2025. **100%** of the below features and defects came from feedback from our customers. Please be sure to continue with your questions/comments on this release and any future enhancements you would like to see!

Below are some of the enhancements available and defects that were fixed.

** Note: Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.

Release Features

Analytics (Sow)

Feature 7868: Added Metrics to System Sow Farm Comparison Report

The following rows have been added to the System Sow Farm Comparison report:

- Non-Productive Days (w/ gilt pool) – row 16
- Non-Productive Days (w/o gilt pool) – row 17
- Herd Parity (w/o gilt pool) – row 100
- Ending Boar Inventory – row 102

Finish

Feature 7773: Market Sales DOA (# and %) added to Closeout Summary Report

'Market DOA' and 'Market DOA as % of Market Pigs' have been added as columns BD and BE to the Closeout Summary report. These are calculated by looking for Event Codes with "Death" Source Category on movements that have a Packer as the destination. (Will not count DOA for other movement types)

Feature 7759: 1st Wean Date Placed added to Mortality By Calendar Week Report

'1st Wean Date Placed' added as column AE to the Mortality By Calendar Week report.

Feature 7757: 1ˢᵗ Wean Date Placed added to Mortality By Production Week Report

'1ˢᵗ Wean Date Placed' added as column AE to the Mortality By Production Week report.

Feature 7758: 1ˢᵗ Wean Date Placed added to Mortality By Week on Feed Report

'1ˢᵗ Wean Date Placed' added as column X to the Mortality By Week on Feed report.

Feature7675: Pending Close added to Group Inventory Distribution Report

'Pending Close' added as column R to the Group Inventory Distribution report.

Finance

Feature 7769: Pig Flow added to Inventory Valuation Summary Report

'Pig Flow' has been added as column C to the Inventory Valuation Summary report.

Feed

Feature 7767: Comments field added to Prepay/Contract Feed form

A Comments field has been added to the Prepay/Contract Feed form to allow for additional information about a contract to be entered.

Feature 7768: Comments added to Grain Bank Perpetual Report

'Comments' has been added as column N to the 'Summary' tab of the Grain Bank Perpetual report.

Release Defects

Finish

Defect 7716: Fix Columns for Hiding on Closeout Summary

Resolved an issue with the 'Total Deaths RWA' (BW) and 'Pigs Produced' (CI) columns, enabling them to be hidden for custom layouts of the Closeout Summary report.

Sales

Defect 7846: Packer Split Sales

When a load being split had dead, condemned, and discounted pigs, and they were split out between groups, the logic for the calculations for each of these categories was using the % of the total market hogs instead of using the % of each of the categories. This has now been corrected.

If you have any questions about the release, please contact MetaFarms Support at support@metafarms.com

Sincerely,

Your MetaFarms Customer Support/Account Services Team
