## Sow Data Entry

The sow data entry screen works similar to indvidual event entry. You can use Sow Event Entry to Search, Edit, and add any of the Sow events. Events can be added for just one sow, or an entire sheet.
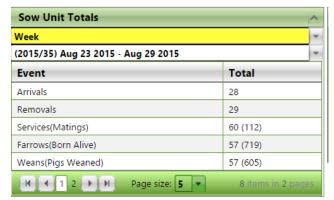

The search Section is where you can either search a certain Sow ID or you can add new events to either one sow or an entire sheet.

1. Enter your criteria then click Add

The Sow Units Total section has the ability to track the number you have entered for each event. You can track either what was entered for that day or for that week by selecting the options in the dropdown. This is helpful for balancing paperwork without having to leave your screen.
