

Sow Farm Feed Intake

Innovative. Precise. Secure.

- Evaluate the Feed Intake at an Individual Sow Farm
 - Know the feed intake in gestation and lactation by report period
 - Consumption and feed costs for Gestation and Lactation
- Combine Feed Delivery Data and Sow Inventory and Performance Data
- Able to select the report periods to evaluate trends
 - You select the report period
 - You select the number of periods to compare

Main calculations include Daily Feed Consumption by Gestation and Lactation Feed for report periods

Sow Farm Feed Intake

Sow Complex: Farms Inc.
Sow Unit: Sow Unit
Cutoff Date: 06/30/2015
Period: 13 Weeks
Number of Periods: 5

BEANMEAL	Quantity	521,555.00	983,554.00

There is a Graphs tab with a graph for Feed Consumption, Daily Feed Cost, and Feed Cost by Weaned Sow/Weaned Pig

Set Up

- You will be able to import feed data at the diet and ingredient level into MetaFarms, Contact MetaFarms Support to help set up locations to apply the feed.
- Important consideration with gestation inventory is when gilts are entered into MetaFarms. MetaFarms Support can help walk you through how to apply that for your operation.
