

Wean to Finish SuperGroups

This report is designed be a way to combine Nursery and Finish groups into one SuperGroup based on their movements.

A SuperGroup is defined as:

All Finish groups that closed in between dates selected

- + All Nursery Groups that fed those Finish Groups
- + Any Finish Groups that fed those same groups but did not close in the date range
- + Any Nursery Groups that fed those Finish Groups that did not close in the date range

Details to know about the report:

- If any Active group is found in the SuperGroup, it will say Incomplete. Performance numbers will not be accurate until that group closes.
- Pig Days are summed.
- Pigs In is Nursery Groups and WTF groups only.
- Report needs to be run at a high level so you are given the options of Pig Flow and Business Unit. To run for the entire company, choose All on Pig Flow. You do not have to use Pig Flows or Business Units to get the report to run.

The Wean to Finish SuperGroups report is found under Finish, Reports, Performance. Enter your report parameters.

Wean to Finish Supergroups

Report By:

Pig Flow:

Start Date: (m/d/yyyy)

End Date: (m/d/yyyy)

The report includes a tab for the Groups included in this report. These are not rolled-up in any way. They can be filtered on any column to look closer into the data.

The report also includes a tab for the Movements associated with the groups. This tab can also be filtered on any column and can help answer questions about why groups are included in the SuperGroup.
