May 2025 Release

Release Notes

A MetaFarms software release will be implemented on May 6, 2025. **100%** of the below features and defects came from feedback from our customers. If you have questions/comments on this release or have any future enhancements you would like to see, email them in to support@metafarms.com.

Below are some of the enhancements available and defects that were fixed.

** Note: Additions to reports can result in changing column headers, inserting new columns and rows, and may affect any macros you have for that report. To help reduce the impact on custom written macros, we suggest users unhide Row 1 and reference the column name vs referencing the letter of the column in the macro.
